

Cornell Cooperative Extension Cornell Garden-Based Learning

Right Plant, Right Place Knowledge Check

In the **MGV Learning Library - Core Preparation Sessions**
this is Section 1.2 in Module 1: The Fundamentals

1. What are four components of a basic site assessment?
2. Describe *Systems Thinking* and its role in gardening.
3. What are the components of soil?
4. List these soil particles from smallest to largest: sand, silt and clay.
5. Describe the relationship of soil to plant growth and development.
6. Soil pH has no effect on nutrient availability and plant health. True or False?

Building Strong and Vibrant New York Communities

Diversity and Inclusion are a part of Cornell University's heritage. We are a recognized employer and educator valuing AA/EEO, Protected Veterans, and Individuals with Disabilities.

7. Organic matter includes components both living and nonliving. True or False?

8. Imagine you have soil that is 50% silt, 25% sand, and 25% clay. Fill in the jar to represent what the Jar Test would look like.
